

João Victor Monteiro de Araújo

Fullstack Developer | Typescript | Node.js | React

LinkedIn: [linkedin.com/in/jvmntr](https://www.linkedin.com/in/jvmntr) | **GitHub:** github.com/Jvmntr

Professional Summary

Fullstack developer with 3+ years of experience in projects for major companies such as IBM. Strong performance in both front-end and back-end, focusing on performance, scalability, and user experience. Skilled in React, Node.js, Java, and API integration. Collaborative mindset, adaptability, and results-oriented approach.

Professional Experience

Software Developer - IBM (Jan 2022 - Feb 2025)

- Developed interactive dashboards using ReactJS, NextJS, and TypeScript
- Integrated APIs, generated PDF reports, implemented GSAP animations, and built Figma prototypes
- Delivered backend solutions with Node.js, MongoDB, MySQL, Python, and Java (Spring)

Relevant Projects at IBM

- **Management App:** Mobile application built with React Native and TypeScript. Secure API integration, authentication, and access control.
- **Monitoring Dashboard:** Web platform built with React, Next.js, and TypeScript for real-time KPI tracking and PDF report generation. Used Styled-components and Figma for prototyping.
- **Automated Messaging System with AI:** Implemented using a low-code platform, it integrates artificial intelligence to automate responses and interactions via WhatsApp. A scalable and easy-to-maintain solution, ideal for real-time automated customer communication.

IT Support Analyst - CDF (May 2020 - Feb 2021)

- Remote customer support, incident resolution, and IT infrastructure maintenance
- Technical documentation and application of support best practices

Education

- **Bachelor's Degree:** Systems Analysis and Development - FIAP
- **Technical Degree:** Information Systems - CEAP
- **Technical Degree:** Graphic Design - SAGA
